PROFESSIONAL SUMMARY

I am a web developer whose expertise includes JavaScript, React.js, Next.js, HTML, CSS, and all aspects of version control with the use of Git and GitHub, and I have a solid comprehension of networking concepts to successfully build efficient and scalable applications. I am driven on delivering dynamic, responsive solutions.

PROJECTS

Chat Application

One-to-One Chat: Secure, real-time private messaging.
Group Chat: Room-based conversations.
User Authentication: Secure login, user profiles, and presence indicators

Typing Test Application

Fixed Duration Tests: Users type for a set period of 30 seconds.
Performance Results: Detailed results displayed after each test, including speed.

Testimonial App

Built a simple testimonial app for easy management and embedding on websites
No coding required—just share a link to manage and customize testimonials.
Features responsive, beautiful layouts to showcase feedback effectively.
